DETAILED ACTION

Response to Amendment

1. The amendment of February 14, 2002 canceled claims 1-11 and 13-118 and added new claims 119-177. Accordingly, the claims now pending are claims 119-177.
2. In view of the amendments and arguments, the Section 112 rejection of record has been overcome.
3. Upon review of the record, the following new rejections are seen necessitated.

Obviousness-type Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 119-177 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 37-50 of parent U.S. Patent No.6,245,805.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the products of the present application encompass the products of the parent patent.

6. Claims 119-177 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 176-183 of copending Application No. 09/829,846. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present products encompass those of the related application. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Claims 119-177 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of copending Application Nos. ^{6,345,770} 09/385,246 (in issue and not available to the examiner), ^{abn} 09/594,317 (not yet assigned) and 10/072,398 (not yet assigned). Although the conflicting claims are not identical, they are not patentably distinct from each other because overlapping subject matter may be involved. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

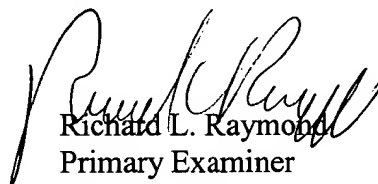

8. This action is not made final in view of the need to overcome and/or differentiate the above patent and applications. Further, it is requested that applicants supply the serial numbers of any other applications containing overlapping subject matter.
